MY CONTRIBUTION TO BANDCAMP

I have been running a small business for the past 3 years, I've developed the following skills and attributes that will immensely benefit the Bandcamp team:

- **Auto-didacticism:** I don't know everything, and that's okay. But, having the ability to develop new skills on my own to adapt and solve unprecedented problems is critical and of utmost importance for today's fast-paced and ever-changing world. Being an autodidact means that my work at Bandcamp will never be limited by my current knowledge.

- **Client-first approach:** A service-based business (like mine) needs to always see things through the customer's eyes and understand what problems need to be solved in order to create value. As a support specialist at Bandcamp, I will use these skills to help the platform users by communicating in a detailed-oriented, but easy-to-follow and nurturing fashion.

- **Learning through Testing:** "FAIL" stands for "First attempt in learning". Learning why something doesn't work is just as important as learning why something else works. This attitude, will help Bandcamp test new project developments.

PROFESSIONAL EXPERIENCE

Mastering & Mixing Engineer (Self-employment)

Jan 2017 - Present

Cavern of Echoes Studios - Toronto, ON

Main Responsibilities:

- Facilitate the recording and mixing process for heavy metal artists wanting to record an album and provide online audio mastering services that ensure audio translation and format compliance for each streaming platform (**including Bandcamp**), and vinyl pressing.
- Guide clients through the music production process (from pre-production to mastering) via written guides or verbal communication.
- Consult on specific problems and offer mix critique via one-on-one sessions through video-call.
- Offer exemplary customer service to ensure that new clients turn into repeating clients.
- Developed a web presence from scratch that allows potential new clients to take and interest and contact and/or follow me.
- Complete day-to-day administrative tasks of running a small business that include, but not limited to: book-keeping, managing Facebook and Google ads, reading industry trends, scheduling projects milestones, nurturing customer relations, market research, website design and maintenance.
